

Target: AI/LLM Engineer · Fintech Platform Engineer · Forward Deployed Engineer (FDE) · Technical Architect | **Stack:** TypeScript · React/Next.js · Flutter · LLM APIs · Cloud

SUMMARY

Software engineer with 14+ years shipping production software across iOS, mobile and web — currently pivoting into AI/LLM and technical architecture. At Capgemini I build and extend client web platforms with React/Next.js/TypeScript on AWS, including backend (Node.js) and CI/CD. Outside client work I ship AI-native products end-to-end: LLM integration, RAG, local model inference, and real deployments. Comfortable embedded in real customer and environment contexts to solve problems on-site — the Forward Deployed Engineer (FDE) profile. Based in Singapore.

TECHNICAL SKILLS

FRONTEND	React, Next.js, TypeScript, Tailwind, Vite, HTML/CSS
MOBILE	Flutter, Swift, Objective-C, iOS (Xcode / CocoaPods), Android
AI / LLM	LLM API integration (Volcano Engine), local Ollama (qwen2.5:3b), KataGo engine bridging, Prompt Engineering, RAG / agentic workflows; Python & Go for AI tooling
CLOUD / INFRA	AWS, CI/CD (AWS, Jenkins, GitLab), VPS, Cloudflare Workers, Supabase (Postgres + RPC), Firebase, iCloud sync
ARCHITECTURE	Systems design, WebSocket bridging (gorilla/websocket), code review, technical feasibility, proofs of concept
TOOLS	Xcode, Android Studio, VS Code, Postman, Git, JIRA, Confluence, Bitbucket, Apigee, MobileIron

PROFESSIONAL EXPERIENCE

Senior Consultant — Capgemini

Singapore · Jan 2022 – Present

- Build and extend client web applications with React.js, TypeScript, Next.js and Tailwind CSS.
- Develop backend services with Node.js; integrate CI/CD pipelines on AWS cloud.
- Work directly with client engineering teams to maintain and extend production systems (client-facing delivery).

Mobile Developer — Equinix

Feb 2020 – Dec 2021

- Revamped the Equinix Customer Portal mobile app in Flutter (work-visit orders, trouble tickets, etc.).
- Maintained a legacy Objective-C codebase; built an MVP for cloud connections to Microsoft ExpressRoute using React.

iOS Developer — UOB

Nov 2018 – Nov 2019

- Led a small iOS team revamping the UOB Business app (Swift) with a new design and CMS integration.
- Bridged native (Swift) and frontend (React.js) features such as QR-code scanning; code review, unit tests, timeline estimation, technical feasibility, POCs.

Mobile Software Developer — Brightoil Petroleum

Singapore · Apr 2017 – Aug 2018

- Built EBunkering, an oil-trading e-commerce iOS app, from scratch in Swift as the sole iOS developer (App Store Oct 2017; revamped May 2018).

Senior iOS Developer — NCS Pte Ltd

Mar 2016 – Mar 2017

- Rewrote a legacy iPad app (Mobile Account Opening) in Swift + JavaScript; merged two codebases into one, improving maintainability, performance and UX.
- Enhanced the OneChat messenger (Objective-C) — bug fixing, UI and performance.

Mobile Developer — HCL Technologies

Oct 2011 – Oct 2015 (intern Apr–Sep 2011)

- Delivered cross-platform & iOS apps (Titanium, native), web apps (HTML5/jQuery), and hybrid financial tools (OCBC FNA).
- Built proofs of concept (Google Glass, OCR, Socket.IO realtime chat) and gathered client requirements, wireframes and customer support — early client-facing delivery.

AI-NATIVE PROJECTS (PERSONAL)

- go-baduk** — Lizzie-style mobile Go analysis app · KataGo + Flutter + Go bridge

Private repo
- Designed a sharded EnginePool (connection-hash sharding) to preserve neural-network cache hit rate.

– gorilla/websocket bridge layer; iOS FFI backend (CocoaPods), Android daemon mode.
- tsumego-app** — ~1050 Go life-and-death problems

Vite → Flutter
- Migrated from Vite + Cloudflare Pages Functions to Flutter; Android-first, KMM iOS port in progress.
- kidcheckin** — family habit-tracking PWA with family-code sync

Cloudflare · Supabase
- Cloudflare Workers edge deployment on top of Supabase (Postgres + RPC) for multi-device shared state.

EDUCATION & CERTIFICATIONS

BSc, Computer Science — Digital Security Systems University of Wollongong (SIM GE), 2019	Diploma in Information Technology Singapore Polytechnic, 2011
AWS Certified Cloud Practitioner Amazon Web Services	Languages English · Mandarin Chinese — professional proficiency in both

WHAT I BRING TO AN AI / FINTECH / FDE TEAM

- Ship AI to production, not just prototypes — go-baduk engine bridging (KataGo) and tsumego-app tooling.

– Bridge tech ↔ business in ambiguous real environments — 14 years of client-facing delivery (Capgemini, UOB, HCL).

– Full-stack + infra fluent — from React/Swift to AWS, CI/CD and Supabase.
